

Walter Lopez

Junior Software Engineer

Plainfield, New Jersey 908-768-1110 Email: walter18lopez@gmail.com | [Linkedin](#) | [Github](#)

TECHNICAL SKILLS

Javascript, HTML, CSS, Node.js, React.js, Postgresql, Express

TECHNICAL PROJECTS

Nox PC Builder- FSA Capstone Project - *Full Stack Developer* | [Github Repo](#) | [Deployed Project](#) February 2023 - present

- Fullstack website designed to simulate an online shopping site.
- Helped construct a database containing user information, and products for sale. Also constructed an api to use said database and integrate it into the website.
- Features an add to cart integration, to finalize the shopping experience.
- Tech Stack: Postgresql, React.js, Express, Node.js, HTML, CSS

Fitnessrac.kr Backend - *Web Developer* | [Github Repo](#)

January 30th 2023 - February 12th 2023

- Backend-oriented project consisting of a database that stores workout routines, and the activities associated with them. Also including user information such as usernames, and routines posted by said users.
- Tech Stack: Postgresql, React.js, Express, Node.js

Strangers' Things - *Web Developer* | [Github Repo](#) | [Deployed Project](#)

December 14th 2022 - January 1st 2023

- Frontend-oriented project. Used a pre-existing api to develop a functioning craigslist like website where users can see others' posts, filter through posts with a search bar, and log in to leave messages on others' posts or create one themselves.
- Tech Stack: Node.js, React.js, HTML, CSS

EXPERIENCE

Stop and Shop, Piscataway, New Jersey

June 2022 - September 2022

Cashier/Online Shopper

January 2022 - March 2022

- Both positions were held at the same time, and either were assigned on a weekly basis.
- Handled the customers last needs, and resolved any queries they may have. Received a copy of a positive review a customer wrote about their memorable experience, which boosted our numbers for customer feedback.
- Assumed the role of Administrator of the Online Shopping department while the previous Administrator went on vacation for two weeks.
 - Managed tasks on my own during the weekday and oversaw operations with other team members on the weekend, our busiest days.
 - Delegated tasks to each member while also contributing, in order to complete all customer orders for the day in the most efficient manner possible.

EDUCATION

Fullstack Academy Web Development Bootcamp,

Software Engineering Certificate, March 2023

- Part-Time, Full Stack Javascript Web Development Immersive

Middlesex County College, Edison NJ - 1 ½ Semester

- Computer Science Major
